Follow manufacturer's installation recommendations. Correct seam sealing is necessary to prevent seam breakdowns. Due to dye lot variations, actual material may vary slightly from samples. For best results, all seams must be row cut and the carpet must be dry laid to optimize pattern match. The manufacturer reserves the right to modify the specifications to improve the product without notice and without prejudice. \*Percentages of recycled content are accurate at date of printing. The availability of these inputs may fluctuate. See [krausflooring.com](http://krausflooring.com) for latest specifications.
