

BioFresh™

BioFresh™ is an anti-microbial treatment that protects against bacteria and fungi. It provides cleaner, fresher carpets by helping prevent the growth of micro-organisms.

features

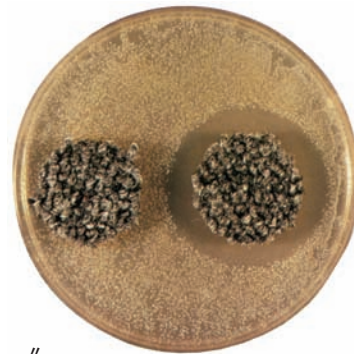

- **Hygienic** — Inhibits the growth of bacteria, mold and mildew for lasting freshness.
- **Odor Control** — Bacteria can cause unpleasant odors. Inhibiting bacteria helps ensure fresher carpets.
- **Protection** — Bacteria and fungi are a common cause of unsightly stains. BioFresh™ inhibits the growth of these micro-organisms between cleanings.
- **Preventive** — Prevents problems before they start - attacks the problem at the source.

cleaner, fresher carpets

protection against bacteria, mold and mildew

Identical carpet samples were sealed in a Petri dish containing a test organism. The sample on the right was treated with BioFresh™. The sample on the left was untreated.

The clear area surrounding the treated sample is the “zone of inhibition” showing how BioFresh™ treated carpet can resist bacteria and fungi attacks.

BioFresh™

recommended

Carpets protected with BioFresh™ are ideal for any location where spilling and soiling are of concern.

Some of these areas include:

- Schools
- Healthcare facilities
- Food service areas
- Offices
- Assisted living areas
- High humidity locations

Bring home the benefits of BioFresh™ commercial-strength protection: Recommended for family rooms, bedrooms and nurseries.

advantages

- **Permanent** — Since BioFresh™ is inherent in the backing, it will not fade or wash off.
- **Effective** — Tested according to AATCC test methods 30 & 147.
- **Safe** — Registered with the EPA and approved by the FDA.

specify BioFresh™

Include the following in your carpet specifications:

- Anti-microbial Construction: Integral to backing laminate.
- Anti-microbial Performance: Contact inhibition of fungal and bacterial growth, tested according to AATCC test methods 30 & 147.
